Assignment Rules

1. **Navbar:** The navbar should contain elements, and on clicking each button it should jump to the corresponding subsection as seen in the video. The clicked button should be differentiated by its color from the heading on top. You are free to choose the colors.

2. **Logo:** Setup a logo as an icon for your webpage. I chose a triangle logo with three cubes named HTML, CSS, and JS on them. You are free to use another logo too.

3. **HTML Abbreviation:** When you click over the HTML abbreviation, the text should appear on it.

4. **Clickable Images:** Make some images clickable as done in the introduction and CSS part in the video.

5. **Link Styling:** For any link, add CSS to show different colors before using the link, on mouse over the link, during the link active, and after the link is used. You are free to choose the colors.

6. **Different Link Targets:** Use links with different targets in the introduction part.

7. **HTML Part:** The HTML part has no functionalities. All text must appear as seen in the screenshots.

8. **CSS Part:** In the CSS part, take two images and show functionalities of image maps and images varying with window size.

9. **Table Design:** Design the table as shown in the screenshots (note the alternating colors used).

10. **Background Image:** Create a part showing some random text with a background image.

11. **JavaScript Functionalities:** All JavaScript functionalities must work as shown in the video.

12. **Mailing Facility:** Observe that a mailing facility is added to the footer as well.

13. **Flexibility:** You are free to use any images and any colors , only functionality and usage of tags past is tested.

All the best, folks! Have fun designing this.
